

## Press Release for Recycling Program

The Town of Ituna after careful analysis and discussion have decided to make changes to the recycling program. We have decided to go ahead with a program with Emterra that involves multi recyclable material bins placed around our community that are emptied on a bi-weekly basis. The implication of the new program will see significant savings in our recycling budget allowing us to work on other programs to serve you better.

We realize there will be an impact on the jobs at the paper recycling depot, however, we also promised the public to be accountable to them. The financial upside and the need to change the program due to the added recycling, we as a council are confident in our decision.

Recycling is huge in any community as it is in Ituna. Every 6 yard bin of recycling that doesn't go into the landfill is already a huge savings for the community.

The new recycling program will be advertised on the website and in the paper over the next few weeks to describe how it runs. Over the last 4 months we have been excited by overwhelming support and positive attitude of the community. We look forward to serving you to the best of our abilities over the next 3 and half years.

Town of Ituna Mayor and Council
